

EMUprog

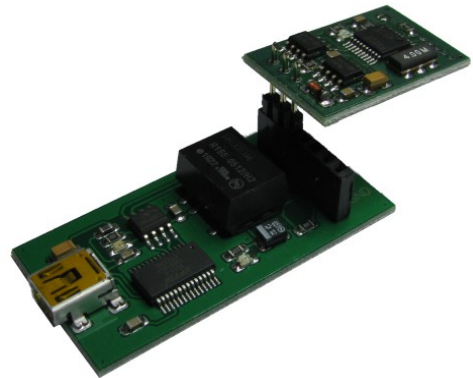

K-line adapter for emulator configuration / testing

Features:

FTDI chip, on-board DC-DC converter which produces 12v from USB power - up to 65 mA (enough to power most emulators without external power supply).

How to use:

Take pin header (2.54mm pitch) with 3 pins, plug it into connector maintaining necessary pin order, attach emulator or whatever else and proceed with all necessary actions. No soldering necessary.

LEDs:

- **GREEN LED:** 12v power indicator,
- **RED LED:** activity on K-line.
